Investment Objective & Strategy

From investment's prospectus

The investment seeks to provide a high and stable level of income derived from bonds issued by the U.S. government and its agencies without incurring undue risk to principal.

At least eighty percent (80%) of the fund will be invested in securities issued by the U.S. government or its agencies or instrumentalities, with the remainder of the fund invested in bank accounts fully insured by the FDIC or collateralized by bonds issued by the U.S. government or its agencies or U.S. Treasury or Agency Notes and Bills. The nominal maturity of it will normally range between 3-10 years.

Benchmark Description: Bloomberg US Govt 1-3 Yr TR USD

The index measures the performance of the U.S. Treasury and U.S. Agency Indices with maturities of 1-3 years, including Treasuries and U.S. agency debentures. It is a component of the U.S. Government/Credit Index and the U.S. Aggregate Index.

Category Description: Short Government

Short-government portfolios have at least 90% of their bond holdings in bonds backed by the U.S. government or by government-linked agencies. This backing minimizes the credit risk of these portfolios, as the U.S. government is unlikely to default on its debt. These portfolios have durations typically between 1.0 and 3.5 years, so they have relatively less sensitivity to interest rates and, thus, low risk potential. Morningstar calculates monthly breakpoints using the effective duration of the Morningstar Core Bond Index in determining duration assignment. Short is defined as 25% to 75% of the three-year average effective duration of the MCBFI.
