TICKER: DPIGX

## Annual Shareholder Report: June 30, 2025

This annual shareholder report contains important information about the Intermediate Government Bond Series (the "Fund") for the period from July 1, 2024, to June 30, 2025. You can find additional information about the Fund at [www.dupree-funds.com/documents](http://www.dupree-funds.com/documents). You can also request this information by contacting us at (800) 866-0614 or [info@dupree-funds.com](mailto:info@dupree-funds.com).

### What were the Fund costs for the last year?

*(Based on a hypothetical \$10,000 investment)*

The table below explains the costs that you would have paid within the reporting period.

Fund	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Intermediate Government Bond Series	\$70	0.70%

### How did the Fund perform last year?

The Federal Reserve cut the fed funds rate on three separate occasions during the 12-month period ended June 30, 2025 (the "Review Period") causing Treasury yields to decline (prices higher) on the short and intermediate portions of the yield curve.

The Fund provided a total return of 4.86% during the Review Period which was lower than the Bloomberg Intermediate U.S. Government Bond Index ("Gov. Bond Index") which provided a total return of 6.23%. The Fund's underperformance was due primarily to the fact that it had a shorter duration of 2.28 years than the Gov Bond Index which had a duration of 3.54 years. Shorter-dated bonds which were anchored to par experienced less price appreciation than bonds with slightly longer durations.

During the Review Period, the Fund's use of its current management strategy did not cause the performance to deviate materially from the manager's expectations. We do not plan to change the investment strategy of the Fund substantially in the upcoming year.

## How has the Fund historically performed?

The following graph compares the initial and subsequent account values at the end of each of the most recently completed 10 fiscal years of the Fund. It assumes a \$10,000 initial investment at the beginning of the first fiscal year in an appropriate broad-based securities market index for the same period.

The Bloomberg Intermediate U.S. Government Bond Index tracks U.S. Treasury and U.S. Agency obligations with nominal maturities between one and ten years. The index is unmanaged and reflects no expenses. It is not possible to invest directly in an index.

Average annual total return values (as of June 30, 2025):

	1 Year	5 Years	10 Years
Intermediate Government Bond Series	4.86%	1.16%	1.88%
Bloomberg Intermediate U.S. Government Bond Index	6.23%	0.15%	1.55%

### The Fund's past performance is not a good predictor of the Fund's future performance.

*The graph and table do not reflect the deduction of taxes that a shareholder would pay on fund distributions or redemption of fund shares.*
